EMERGENCY RESPONSE GUIDE FOR DRILL PRESS ACCIDENTS

1. Call for medical assistance right away if someone is injured. Dial [emergency phone number] or notify the designated first aid provider.
2. Turn off the drill press and any other equipment involved in the accident to prevent further injury or damage.
3. Secure the area to prevent further accidents or injuries. Close off the area around the drill press and any related equipment, and post a sign to alert others.
4. Gather any necessary information, such as the names of witnesses and a description of the incident. Document the details of the accident, including the time and date, the names of those involved, and any equipment or materials used.
5. Follow up with any necessary reporting or paperwork, such as filing an incident report or notifying relevant regulatory agencies.

Remember to stay calm and act quickly in the event of a drill press accident. By following these steps, you can help ensure the safety of everyone in the workplace and minimize the impact of accidents or injuries.
